LUT PACK

5 SIGNATURE LUTS

Original looks, handcrafted through filmmaking and color experimentation. Make everyday footage feel like yours.

WHAT'S INSIDE

01	KEEFILMS	1 LUT
02	FLOW	1 LUT
03	BLUEORANGE	1 LUT
04	SUNDOWN	1 LUT
05	DEEP	1 LUT

Creative .cube LUTs for footage normalized to Rec.709 / Gamma 2.4. For LOG or RAW footage, convert to that reference before applying the look.

START AROUND 20-80% Adjust intensity to taste.

A clean image.
Your own look.

A LUT is a creative starting point. Exposure, white balance and a consistent color workflow help it work at its best.

01 APPLY THE LOOK

These are creative LUTs, not camera conversion LUTs. Balance exposure and white balance before the look LUT. Convert LOG / RAW footage to Rec.709 / Gamma 2.4, apply a KEEFILMS LUT, then fine-tune and match your shots.

NORMALIZE TO REC.709 / APPLY LUT / FINE-TUNE

02 COMPATIBILITY

The standard .cube format is intended for apps that support custom 3D LUTs. Examples include DaVinci Resolve, Adobe Premiere Pro and Final Cut Pro. Import support, intensity controls and color handling depend on the app and version. Check your installed version before purchasing.

03 COLOR MANAGEMENT

Reference input and output: Rec.709 / Gamma 2.4. In a color-managed workflow, apply the LUT where the image matches this reference. Applying it directly to LOG, HDR or DaVinci Wide Gamut footage can produce unintended results. Avoid an additional, unintended conversion.

GOOD TO KNOW

Results vary with camera, lighting, skin tone, exposure and source footage. Screens, browsers and export settings can shift color and contrast. A LUT cannot repair poor exposure or lighting, and it does not include grain, halation, glow, masks or tracked corrections.

The details, kept simple.

BEFORE YOU BUY

Confirm your app can import .cube LUTs and your footage can be normalized to Rec.709. Review the license and refund terms below. Results naturally vary by footage.

04 YOUR LICENSE

Your purchase includes a single-user license for personal and commercial creative work. Additional users should purchase their own copy.

YOU CAN

Use the LUTs in personal projects, paid client work, films, social content and monetized videos.

Export and deliver finished images or videos that use the LUTs.

PLEASE DON'T

Share, upload, resell or redistribute the LUT files, including modified versions.

Bundle them in packs, templates or downloads, or transfer them to another user.

05 REFUNDS + SUPPORT

Because this is an immediately delivered digital product, purchases are generally non-refundable after file access or download, where permitted by applicable law. For genuine file problems, duplicate charges or delivery issues, contact KEEFILMS through the store with your order details. We will help resolve the issue. Nothing here limits rights that cannot legally be excluded.

Support covers download access, file integrity and basic installation guidance. Project-specific grading, shot matching, software training and creative troubleshooting are outside the product support scope.

Film and photographic references describe aesthetics only. KEEFILMS is not affiliated with or endorsed by camera, software or film manufacturers. Please review this guide together with the terms shown at checkout.
